Professional Summary

Full stack web developer graduated from UC Berkeley Extension Coding Bootcamp. Recently developed skills in HTML, CSS, JavaScript, jQuery, and researching and implementing third-party APIs. My goal is to give users a welcoming user experience while also being able to cater to specific needs. A project I took part in was an application that allowed the user to search a city for restaurants that cater to their budget, food of interest, and location. Looking forward to showcasing my abilities to produce products that would help create better online experiences.

Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, Bulma, AJAX
Backend: MySQL, Express, Node

Projects

Feed Me | https://bit.ly/3l3wIzE | https://bit.ly/3v0drGh   Front-end

- The app allows the user to input a city within the US, budget, and restaurant type and present them with a random restaurant fitting this criteria.
- This project caters towards users who want someone or something to decide a restaurant for them.
- Responsible for working with the response data from the API and translating that data to the DOM elements for the users to view.
- Tools/Languages: HTML, CSS, Bulma, JavaScript, AJAX, Google Maps API, Google Places API, Yelp API

Weather Dashboard | https://bit.ly/3gYyIrC | https://bit.ly/3s0N2Xd   Front-end

- This app displays the weather forecast of the city of the user's choice
- This project is meant to create a relevant weather app for modern users.
- Responsible for the HTML, styling, and API calls.
- Tools/Languages: HTML, Bootstrap, JavaScript, jQuery, Geocoding API

Flora | https://bit.ly/3R3TzLd | https://bit.ly/3yzubWv   Full Stack
- This application is an e-commerce website for purchasing flowers
- Responsible for implementing dynamic styling such as Hover.cs, assisted with data structures and general design
- Tools/Languages: HTML, CSS, JavaScript, React, JWT, MongoDB, Mongoose, Apollo Server, Material UI, Hover.css
